PRICE NOW is a live mark while a position is open, so the P/L beside it is unrealised. A price tagged EXIT is an actual close and moves that row into realised. P/L figures are as reported by the broker and can differ from price x volume by the fill, spread and financing.

Per 1.00 lot, \$1.00 of price movement is worth: XAUUSD \$100 • WTIUSD \$1,000 • XAGUSD \$5,000 • BTCUSD \$1 • DJIUSD \$1. volume = 1R / (stop distance x that value). R:R must be at least 1:3. Round volume down.
